👤 PROFILE

I am a motivated and hardworking Computer Science student with a strong foundation in software development, problem-solving, and effective communication. I thrive in collaborative environments and have successfully contributed to team projects with efficiency and clarity. I am quick to adapt, eager to learn, and committed to continuous growth through real-world challenges and innovation.

🎓 EDUCATION

2021 – 2025 Dhaka, Bangladesh	Bachelor of Science in CSE Green University of Bangladesh
2019 Natore, Bangladesh	Higher Secondary Certificate Nawab Siraj-Ud-Dowla Govt. College
2017 Natore, Bangladesh	Secondary School Certificate Natore Government Boy's High School

💼 PROFESSIONAL EXPERIENCE

07/2025 120/3 Kuril, Vatara, Dhaka	Zensoft Lab 🔗 Intern Developed responsive web interfaces using React and TailwindCSS with seamless API integration, ensuring high performance and cross-platform compatibility while collaborating in an agile, UI/UX-focused workflow.

🧠 SKILLS

- Project Management
- Programming
- Problem Solving
- Web Developing
- Critical Thinking
- Attention to Detail
- Communication

{ } PROGRAMING LANGUAGES

- Python
- HTML
- CSS/TailwindCSS
- PHP
- JavaScript
- MySQL
- React

📁 PROJECTS

Safe Ecommerce

Developed a scalable e-commerce platform with secure authentication, responsive design, and seamless API integrations, including real-time customer–seller chat via WebSockets with automated seller reassignment.

Artishan

A responsive online art portfolio showcasing creative works with a clean gallery-style layout and minimalist UI/UX for an elegant browsing experience.

Hero IO

A responsive app marketplace built with JavaScript, featuring live search, sorting, detailed app pages with charts, and localStorage-based install management with toast notifications.

E Care Hub

Developed a responsive healthcare platform using PHP, HTML, and CSS with secure user authentication, email verification to reduce fraudulent accounts, and an admin panel for efficient data management.

CS — Ticket System

A responsive React-based ticket management dashboard with interactive task tracking, dynamic status counters, and real-time updates using React hooks and React-Toastify.

Green Earth

A responsive eco-campaign app built with HTML, Tailwind CSS, and JavaScript, featuring dynamic plant browsing, category filtering, and a real-time cart system with modal details for an engaging user experience.

Emergency Service

A responsive web project built with HTML, CSS, and JavaScript to display assignments in a clean and user-friendly layout.

 INTERESTS

- Machine Learning (ML)
- Artificial Intelligence (AI)
- Reading Books

 THESIS

10/2024 – 07/2025
Dhaka, Bangladesh

Uncovering Core Genes through Expression Profiling, Functional Enrichment, and Survival Analysis in Hepatocellular Carcinoma via Machine Learning and Systems Biology Approaches

Uncovering Core Genes and Biomarkers in Liver Cancer through Machine Learning and Systems Biology.

Applied machine learning and systems biology methods to analyze gene expression data, identifying core genes linked to patient survival in hepatocellular carcinoma. Performed functional enrichment and survival analyses to highlight potential biomarkers and therapeutic targets for improved cancer diagnosis and treatment strategies.

 EXTRA CURRICULAR ACTIVITIES

03/2023 – 05/2025

Executive Member
Green University Computer Club (GUCC)

2024

Volunteer
Intra Department Programming Contest (IDPC)
