CAREER OBJECTIVE

A highly motivated and passionate Computer Science graduate, eager to start a career as an AI Engineer with a focus on Natural Language Processing. Possess a strong foundation in machine learning, text representation techniques, and speech recognition, along with practical knowledge of Python and popular NLP libraries. Enthusiastic about working with open-source LLMs and applying supervised learning techniques to solve real-world problems. Dedicated to continuous learning, innovation, and contributing effectively within a team-oriented environment. Looking forward to utilizing my skills and academic experience to support impactful AI projects and grow alongside a forward-thinking organization

ACTIVITIES

East West University Sports Club

2021-2024

As an Event Executive, I organized and managed various sports events, tournaments, and intra-university competitions. I coordinated logistics, managed budgets, and led a team of volunteers to ensure smooth event execution. I collaborated with university departments and sponsors to enhance engagement and participation. My role involved planning, promotion, and on-ground supervision, along with maintaining safety standards and schedules.

SKILLS

<u>Programming Languages</u>	<u>Design Tools</u>	<u>Documents Editor</u>	<u>Soft Skills</u>	<u>Languages</u>
C, C++, Java JavaScript ,Python Fremwork , HTML, CSS,Cisco packet tracer	Adobe Photoshop Adobe Illustrator Adobe Premiere Pro	Microsoft Office 365 Google suite WPS office	Quick Learners Leadership Negotiation Problem Solving	Bangla English Hindi

PPROJECT

- This study evaluates five deep learning models for automated leukemia detection using 20,000 microscopic blood images. It classifies five leukemia subtypes and healthy samples, enhancing clinical diagnosis. ViT-b-16 achieved the highest accuracy (86.78%), despite some misclassification. The research highlights AI's potential to improve early and accurate leukemia detection through advanced image-based classification.
- The project analyzes a year's pizza sales using machine learning and deep learning models to forecast future sales. Techniques like Random Forest, SVM, CNN, and RNN were evaluated. RNN showed the highest accuracy. Visualizations and statistical analysis helped uncover sales trends, seasonal patterns, and customer preferences.

EDUCATION

Bachelor of Science in Computer Science and Engineering

2020-2025

Major: Data Science Engineering

East West University, Dhaka.

Higher Secondary School Certificate

2018-2019

Ishwardi Govt.college ,Ishwardi , Pabna.

Secondary School Certificate

2016-2017

Sara Marwari Model School &College, Ishwardi , Pabna.

EXPERIENCE

Bdcalling IT Ltd.

5 Months
