Summary

Dedicated Computer Science graduate specializing in Intelligent Systems and Data Science. Experienced in implementing machine learning models, developing web applications, and contributing to academic research. Passionate about applying technology to solve real-world problems and collaborating in team-oriented environments.

Education

B.Sc. in Computer Science and Engineering

East West University, Dhaka, Bangladesh (Sept 2019 – Oct 2024)

- **Major:** Intelligent Systems and Data Science
- **Credit Earned:** 140
- **CGPA:** 2.59 out of 4

Relevant Skills

Programming: Python (**Flask**), Java, JavaScript (**React JS**, **Express JS**, etc.),
Database: Document-based Database (**MongoDB**), Relational Database (Oracle SQL)
Language: English (Professional Proficiency), Bengali (Native Proficiency).
Others: **Git**, Problem Solving, Time Management, Team Communication, Team Leadership.

Projects

- **Deep Learning Techniques for Tailings Pond Detection and Categorization** April 2024 – June 2024
Academic Project, (5 Members)
 - We built a web app for detecting and categorizing tailings ponds using YOLOv5/YOLOv8, InceptionV3, ResNetRS152, and VGG16.
 - We used image preprocessing before fitting the data into our model.
 - We also wrote a research paper on this project.
 - **Technology Stack:** Python, Pandas, NumPy, Scikit-learn, Transformer, Flask API, TensorFlow.
- **Cervical Cancer Classification** April 2024 – June 2024
Academic Project, (2 Members)
 - Implemented FixMatch semi-supervised learning to classify cervical cancer with enhanced preprocessing.
 - Before training our model, we used image processing technique for the best result over raw data.
 - We also wrote a research paper on this project.
 - **Technology Stack:** Python, Pandas, NumPy, Scikit-learn, Transformer, TensorFlow.
- **Twitter Sentiment Analysis** October 2023 – January 2024
Academic Project, (3 Members)
 - Created an NLP model using BERT and RoBERTa to analyze sentiment on therapies from Twitter data.
 - We used data preprocessing before fitting the data into our model.
 - Co-authored a research paper currently under review.
 - **Technology Stack:** Python, Pandas, NumPy, Scikit-learn, TensorFlow, NLTK.
- **ODI Cricket Score Prediction** July 2023 – September 2023
Academic Project, (Team Leader, 5 Members)

- Developed regression models achieving R^2 of 0.917 using a dataset of 1.25M+ records.
- We also used feature engineering over the dataset for maximum outcome from our model.
- **Technology Stack:** Python, Pandas, NumPy, Scikit-learn.

• FIFA World Cup Database System

November 2022 – January 2023

Academic Project, (4 Members)

- Designed an Oracle Apex app for match fixtures, team details, and venue information with dynamic triggers for goal tracking.
- Through this ORACLE application users can see full match fixtures, each team detailed information like all players' name, coach, manager, captain and their match venue. We tried to create this project like the FIFA World Cup 2022 official website with some features like player of the match, match referee, venue and its time and location etc.
- Before the implementation phase, E-R model and Relational model were done.
- We also wrote a research paper on this project.
- **Technology Stack:** Oracle Apex, PL/SQL, E-R and Relational Model.

Achievements

- Half-passer (Morning), ITEE FE Exam, October 2023.
- Participated in ICPC Dhaka Regional Contest – 2022.

Publications

- Implementation of Bangla Extractive Update Summarization Task on BUSUM-BNLP-Dataset: A Multi-Document Update Summarization Corpus
Md Nahid Hasan, Rafsan Bari Shafin, Marwa Khanom Nurtaj, Zeshan Ahmed, M Saddam Hossain Khan, Rashedul Amin Tuhin, Md Mohsin Uddin.

DOI: 10.1007/978-981-96-6053-7_34

Other Activities

- **Home Tutor:** Teaching students for the last 5 years
- **Volunteering:** I along with my friends raised funds to aid individuals and families who were facing financial difficulties during the COVID-19 pandemic lockdown.

Professional Interests

I am passionate about leveraging technology to solve real-world problems, with a strong interest in machine learning, artificial intelligence, and software development. I aspire to excel as a Machine Learning Engineer while expanding my expertise in software development to design, deploy, and optimize robust applications. I am particularly enthusiastic about working on projects involving deep learning, natural language processing, and full-stack application development, combining cutting-edge AI techniques with high-quality software solution.
