PankajMahanto

Personal Statement

Passionate Machine Learning Engineer with hands-on experience in **Natural Language Processing (NLP)**, computer vision, and deep learning. Proficient in Python, TensorFlow, PyTorch, and modern ML frameworks. Currently working on NLP-based research projects involving **Large Language Models (LLMs)**, text analysis, and language understanding. Strong foundation in data analysis using Pandas and NumPy, with practical experience in end-to-end ML model development and deployment.

Education

Green University of Bangladesh, Computer Science and Engineering

2021 to 2025

- CGPA: 3.90/4.0
- **Coursework:** Software Foundations, Computer Architecture, Algorithms, Artificial Intelligence, Comparison of Learning Algorithms, Computational Theory, C, OOP in C++, Java, C, Compilers, Data Structures, Database (SQL), Assembly, OS, Web Programming

Cambrian College, Higher Secondary School Certificate (HSC)

2017 to 2019

- GPA: 4.33/5.0

Experience

IT Bangla Firm, Junior Software Engineer, Remote Job

SAVAR, DHAKA

- Working with a startup Company.

May 2022 to Apr. 2023

1 year

Bondstein Technologies Limited, **Intern**

Tejgaon I/A, 138, 1 Bir Uttam

(**Research and Development - Machine Learning Team**)

Mir Shawkat Sarak, Dhaka

Jul. 2025 to Oct. 2025

- Worked as part of the Machine Learning team focusing on research and development of AI models.
- Worked in the Research and Development department focusing on multiple real-world machine learning projects.
- Contributed to the design, development, and testing of AI models for practical applications.
- Applied ML algorithms to solve business problems and collaborated with cross-functional teams to deliver results.
- Gained hands-on experience with real-world data and improved model performance in practical scenarios.

Projects

NextWorkX - AI-based Job Portal [Github Link](#)

PHP, MySQL, Python, NLP,
HTML/CSS/JS
Jun. 2025

Full Stack Project | ML + NLP + Web

- Built an AI-powered job recommendation system using **NLP techniques** for intelligent CV parsing and job matching.
- Implemented **text extraction and entity recognition** from CVs to extract skills, experience, and qualifications.
- Applied **NLP-based semantic similarity** algorithms to match candidate profiles with job descriptions.
- Role-based dashboards for admin, job seekers, and recruiters.
- Integrated PHP, MySQL, Python ML models with NLP pipeline, and modern UI.

Bangla Fake News Detection [Github Link](#)

Python, Streamlit, NLP,
BERT, Scikit-learn
Apr. 2025

NLP & Machine Learning Project

- Developed a Bangla fake news detection web app using advanced **NLP techniques**.
- Implemented **text preprocessing, tokenization, and feature extraction** using TF-IDF.
- Applied **BERT-based transformer models** for contextual language understanding.
- Integrated Logistic Regression, SVM, Random Forest, and Naive Bayes classifiers.
- Supported multilingual input with **automatic language detection and translation** using NLP libraries.
- Achieved competitive accuracy in detecting misinformation in low-resource Bangla language.

Diwali Sales Analysis [Github Link](#) EDA and Business Insights

Python, Pandas, NumPy,
Seaborn, Matplotlib
Dec. 2024

- Conducted Exploratory Data Analysis on Diwali sales data using **Pandas and NumPy**.
- Performed **data cleaning, transformation, and statistical analysis** on large datasets.
- Visualized consumer trends based on age, gender, occupation, and product categories.
- Helped identify target demographics and peak selling products for marketing strategy.

AI-based Emotion Recognition System [Github Link](#)

Python, PyTorch, CNN,
Deep Learning
Jun. 2024

Deep Learning & Computer Vision Project

- Built real-time emotion detection system using **Deep Learning (CNNs)**.
- Detect from real time video, video files, and images.
- Implemented using PyTorch and achieved high accuracy in emotion classification.

Skills

Programming Languages: Python (Advanced), Java, C/C++, Assembly

Natural Language Processing (NLP): Text Preprocessing, Tokenization, POS, TF-IDF, CBOW, Skipgram, Word2Vec, BERT, Transformers, Hugging Face, NLTK, SpaCy, Language Translation, Sentiment Analysis, Text Classification

Machine Learning & Deep Learning: TensorFlow, PyTorch, Keras, Scikit-learn, CNNs, RNNs, LSTMs, Large Language Models (LLMs)

Data Analysis Tools: Pandas, NumPy, Matplotlib, Seaborn, Data Preprocessing, Feature Engineering, Statistical Analysis

Computer Vision: OpenCV, Image Processing, Object Detection

Software Tools: VS Code, LATEX, Netbeans, Visual Studio, AutoCAD, CodeBlocks, Notepad++, Figma, Cisco Packet

Tracer, EMU8086

Soft Skills: Communication, Team Collaboration, Problem Solving, Adaptability, Leadership, Time Management

Additional Experience And Awards

VC Award: Received **5 Vice Chancellor Awards** and **5 Dean Awards** from Green University of Bangladesh in recognition of outstanding academic performance, including achieving a perfect **CGPA of 4.00 out of 4.00**.

Math Olympiad 2016 I achieved the Math Olympiad 2016 in Narayanganj District in 2nd Place.

Achievements

Programming Achievements

- Hacker Rank problem solved more than 200.
- [Codeforces](#) problem solved more than 200.
- [LeetCode](#) Problem solved more than 50

Certifications

AI+ Prompt Engineer Level 1™ – AICerts (2025)

Certified by AICerts™ after Agent X competition powered by Microsoft and NetCom Learning. Covered prompt design, zero-shot/few-shot strategies, and real-world LLM applications.
