Summary

I'm a Detail-oriented and proactive Computer Science graduate with hands-on experience in machine learning, deep learning, and data analytics. Adept at developing efficient algorithms, optimizing model performance, and translating data-driven insights into actionable business solutions. Skilled in Python, computer vision, and modern AI frameworks. Passionate about leveraging technology to enhance productivity, improve decision-making, and drive innovation in dynamic IT environments.

Education

Master of Science in Computer Science and Engineering <i>Comilla University, Bangladesh</i>	Expected Nov 2025 <i>GPA: Pending</i>
Bachelor of Science in Computer Science and Engineering <i>Comilla University, Bangladesh</i>	Jan 2019 – May 2024 <i>GPA: 3.26 / 4.00</i>

Experience

Research Assistant <i>Department of CSE, Comilla University</i>	Feb 2023 – Jan 2025 <i>Comilla, Bangladesh</i>
– Assisted in UGC-funded research projects involving deep learning and IoT-based solutions. – Implemented, evaluated, and optimized CNN architectures for real-world applications. – Prepared technical reports, data documentation, and visualizations for publication.	

Selected Projects

Political Affiliation Prediction using Demographic and Psychological Features	Jun 2025 – Present
– Developing a machine learning model using ANES 2024 dataset to predict political party affiliation. – Applying demographic and psychological features for classification tasks and exploring LLM + RAG-based insights.	

Mobile SkinDoc: Transfer Learning Fusion of MobileNet and EfficientNet	2024
– Designed a lightweight CNN-based skin disease recognition app for mobile devices using transfer learning. – Proposed a fusion approach improving model robustness and accuracy.	

IoT-based Irrigation Alert System for Bangladesh	2024
– Built a low-cost IoT system using sensors and GSM to alert farmers about optimal irrigation times. – Improved water efficiency and crop yield; selected under UGC-funded scholarship project.	

Bengali Character (Shatakia) Classification	2024
– Developed a CNN model to classify Bangla handwritten characters using a custom dataset. – Achieved high accuracy with augmentation and hyperparameter tuning.	

Student Result Management System	2022
– Created a web-based system using PHP and MySQL to store and manage student data efficiently.	

Technical Skills

Programming: Python, C++, PHP, MySQL, HTML, Matlab

Frameworks: TensorFlow, PyTorch, Keras, scikit-learn

Tools: Google Colab, Visual Studio, PyCharm, Anaconda Navigator

Specialized Areas: Deep Learning, Computer Vision, Data Analysis, Web Development

Achievements

- Ranked 4th — ESDG4BD Grace Hopper Girls Programming Camp (Individual Category).
- Ranked 20th — National Girls' Programming Contest (2022).
- Ranked 27th — Ada Lovelace National Girls' Programming Contest (2022).

Key Coursework

Data Structures and Algorithms, Object-Oriented Programming (C++), Database Systems, Operating Systems, Discrete Mathematics, Computer Architecture, ,Introduction to Data Science, Machine Learning
