RESEARCH INTEREST

Natural Language Processing, Social Network Clustering, Machine Learning, Artificial Intelligence

EDUCATION

Jahangirnagar University

March 2020 – June 2025

B.Sc. in Computer Science and Engineering

CGPA: 3.71/4.00

TECHNICAL SKILLS

Languages: C, C++, Python, Java, HTML/CSS, JavaScript, SQL

Machine Learning: OpenCV, Matplotlib, Pandas, Scikit-learn, LLM, RAG, Multimodal, GenAI

Web Development: React (front-end), Responsive Web Design, Bootstrap, Tailwind CSS, MySQL, MongoDB

Development Tools & IDEs: VS Code, IntelliJ IDEA, NetBeans, Android Studio, LATEX, Git, Github, Trello

Testing and Documentation Tools: JUnit, Dokka, Sphinx, Manual Testing, Selenium, Postman, Jmeter, Agile

TEACHING EXPERIENCE

Coding Instructor | CoderPals

June 2024 – Present

- Instruct kids & teens aged 5 to 18 become future tech leaders by keeping things fun and creative teach them Python basics like data types, objects & methods, and show them how to test, debug & build cool little projects along the way.

PROJECTS

Smart Note | **BERT, T5, RAG, Python**

Ongoing

- * Developed an AI-based summarizer using fine-tuned BERT for summary-type classification, T5 for abstractive summarization, and RAG for contextual question-answering over the summarized content.

Academic Machine Learning Project: Leaf Classification | **Python**

March 2025

- * Developed & trained a leaf classification model using SGD classifier with Scikit-learn; improved accuracy through feature scaling & performing hyperparameter tuning using grid search.

Student-Assistant: Enhancing Student Life with Effortless Organization | **Java, XML**

December 2024

- * Developed an all-in-one student productivity app integrating task management, note-taking & personal finance tools. Implemented real-time expense tracking, automated text summarization & smart reminders to enhance student organization and financial management.

Smart Living Community | **Java, XML, Firebase, MVVM**

September 2024

- * Built an Android community management app with real-time Firebase integration for service requests, bill payments, event coordination, and security monitoring; enhanced development and user experience using Test-Driven Development (TDD), Gradle dependency management, CI/CD pipelines, and UI/UX improvements for seamless operation.

Photobook System (Console-Based Project) | **C**

October 2021

- * Developed a secure console-based Photobook System in C with user authentication & account creation, along with extra modules like a multifunction calculator (for arithmetic, conversions, Fibonacci & sorting) and a Tic-Tac-Toe game; used Code::Blocks IDE to build, run & test the system for functionality and performance.

PROBLEM SOLVING SKILLS & EXPERIENCE

- * Participated in the **International Collegiate Programming Contest (ICPC) 2021** Preliminary Round.
- * Participated in the **National Girls Programming Contest (NGPC) 2021** Preliminary Round.
- * Solved 450+ problems on **Codeforces (Max Rating: 958)** with the handle **Shanjida_Alam353** and on **Codechef (Max Rating: 1111)** with the handle **shanjida_29**

ACHIEVEMENTS

International Astronomy and Astrophysics Competition 2020: Successfully secured over 20 out of 25 points by solving five advanced astronomy and astrophysics problems during the qualification rounds.

VOLUNTARY ACTIVITIES

- * **NCPC 2023:** Acted as a **volunteer** in NCPC 2023 hosted by the Department of CSE, Jahangirnagar University.
- * **Binary Brains Battle 2022:** Acted as a **volunteer** in Binary Brains Battle 2022 (Intra Jahangirnagar University Monthly Programming Contest) hosted by the Department of CSE, Jahangirnagar University.
- * **Banglar Math Platform:** Acted as a **front-end designer** to build a game project **shongkhar-pyramid**.
