PROFILE

Aspiring Full Stack Software Developer seeking to leverage expertise in React, Node.js, Laravel, and Vue.js to design and implement scalable web applications. Eager to contribute to a dynamic development team, solve complex problems, and deliver high-quality software solutions that align with business goals.

WORK EXPERIENCE

- Battery Low Interactive Ltd.**2024 - PRESENT
- Full Stack Developer
- Develop and maintain responsive web applications using React.js, Vue.js, Node.js, and Laravel.
 - Design and implement RESTful APIs and integrate third-party services.
 - Manage MySQL, PostgreSQL, and MongoDB databases, ensuring data integrity and query optimization.
 - Build dynamic, user-friendly interfaces with HTML5, CSS3, Tailwind CSS, and Material UI.
 - Implement authentication, authorization, and secure data handling.
 - Debug, test, and optimize full-stack code for performance and scalability.

PROJECTS

1. Building Inventory and Maintenance History (BIMH) – Full Stack Development
 - Developed modules for building records, maintenance tracking, and user management.
 - Implemented dynamic UI components and role-based access control.
 - Tech: PHP (Laravel), Vue.js
2. Design Management System (DMS) – Full Stack Development
 - Built workflows for design submission, approval, and version tracking.
 - Developed backend endpoints and reusable front-end components.
 - Tech: PHP (Laravel), Vue.js
3. The Financial Express – Full Stack Development
 - Contributed to developing and maintaining content management and publishing modules.
 - Optimized data handling and improved system performance for news and article delivery.
 - Tech: PHP (Laravel), Vue.js

EDUCATION

- B.SC Engineering (CSE)**2018 - 2022
- Chittagong Independent University
