PROFILE INFO

Experienced NLP specialist with 4+ years designing and deploying advanced models using deep learning, named entity recognition, sentiment analysis, and language modeling. Proven ability to lead teams, integrate NLP solutions into scalable products, and drive business value through intelligent automation. Committed to continuous innovation in AI-driven language technologies.

EXPERIENCE

July 2024-September 2025

Battery Low Interactive Ltd.

Senior Natural Language Processing (NLP) Specialist

- Lead the end-to-end development and deployment of NLP models that power enterprise applications.
- Architect and maintain scalable NLP pipelines, optimizing efficiency and model accuracy for real-time text analytics.
- Collaborate closely with software engineers, data scientists, and product managers to translate business needs into technical solutions.
- Conduct research and implement cutting-edge NLP methods including transformer architectures and contextual embeddings.
- Mentor junior team members and oversee project milestones and quality controls.

EDUCATION

MSS in Economics (2019)
National University
Noakhali Govt. College.

BSS in Economics (2017)
National University
Noakhali Govt. College.

EXPERTISE

- Natural Language Processing model development and optimization
- Text mining and data preprocessing for large-scale datasets
- Named Entity Recognition, sentiment analysis, and language understanding
