Mohammadpur, Dhaka-1207

CORE SKILLS

Requirement Analysis
& Documentation

System Design(UML, ERD, Flowcharts)

SDLC & Agile

API & Tech Specs Writing

Workflow & Use Case Modeling

QA (Manual & Unit Testing)

Database (MySQL)

AI/NLP Project Understanding

Tools: Lucidchart, Draw.io,
Confluence, Jira, Postman

EXTRA CURRICULAR
ACTIVITIES

- Programming Contest, ECS CF 2015, BRAC University, sponsored by BRAC IT Services Ltd. (biTS)
- Assistant Director, Marketing and Press Release, BRAC University Art Society (ASBU)
- General member, BRAC University Computer Club (BUCC)

WORK EXPERIENCE

- System Analyst

Battery Low Interactive | Dhaka, Bangladesh

Aug. 2023 - Current

 - Translate business needs into technical requirements; create workflows (UML, ERD), conduct feasibility analysis, and maintain system documentation.
 - Coordinate with developers/testers on SDLC, validate integrations, and support AI-driven automation enhancements.

TRAININGS

- Research And Development Trainee at BRAC Learning Centre (Community Services Program), Bogra (Oct. 2018)
- Intern, Software & Digital Services at String Technology Limited (Nov. 2022 - Feb. 2023)
- LICT Android course, conducted by Bangladesh Computer Council (BCC)
- Computer Graphics Design, with National Youth Development Training Centre (NYDTC)
- Microsoft Young Bangla Training and Internship (Sept. 2018)

SIGNIFICANT PROJECTS

Ministry of Housing and Public Works (PWD)

1. Building Inventory and Maintenance History (BIMH)

- Analyzed business requirements and converted them into system workflows.
- Coordinated back-end and front-end development to ensure system alignment.
- Conducted system testing and validation to maintain data accuracy and integrity.

2. Design Management System (DMS)

- Documented stakeholder requirements and system specifications.
- Designed workflows and process flows for approvals.
- Coordinated with developers to implement system features.

3. Integrated Budget and Accounting System (IBAS++)

- Conducted feasibility studies and analyzed requirements for budgeting modules.
 - Ensured system compliance with accounting standards and policies.
 - Coordinated module integration with development teams.
-

PERSONAL PROJECTS

1. INVENTORY MANAGEMENT SYSTEM

- Designed inventory workflows, access controls, and dashboards.
- Integrated APIs and implemented permission-based authorization.
- Tools: Laravel, ReactJS, Material UI

2. PAYROLL MANAGEMENT SYSTEM

- Analyzed payroll requirements and designed performance dashboards.
- Validated external API data for accuracy.
- Tools: ReactJS, Next.js, Tailwind CSS

3. CHAT APP USING WEBSOCKET

- Defined user communication flows and real-time interaction requirements.
- Coordinated front-end and back-end integration.
- Tools: Laravel, ReactJS

PUBLICATION & PRESENTATION

- "An Efficient Image Processing Technique for Brain Tumor Detection from MRI Image," First Author, IEEE Xplore Digital Library, December 2019, pp. 1-6, and also available on ResearchGate, March 2021.

Presented at: 6th IEEE CSDE 2019, the Asia-Pacific Conference on Computer Science and Data Engineering, December 2019, CQ University, Melbourne, Australia.

Summary: Designed and implemented a system for detecting brain tumors more accurately than the alternative ways and wrote the paper.
